Sump Capacity	6100 litres
Shelf Space	135 cm
Colour	Green RAL 6029
Tare weight	4400 kg

Description:

The base of this bundled store is manufactured from 3mm mild steel sheet with RHS cross members and pressed ribs.

The corner posts, shelf frames and main rails are all made from rolled hollow section.

The back, sides and door are pressed from 2mm mild steel sheet (corrugated as required for additional strength) while the roof is pressed with suitable bracing.

The store is welded around the perimeter, fitted with crane lifting points (maximum 2000 kilos per lift point), double hinged doors and a fully seam welded sump fitted with full width plinths to eliminate ground contact.

The triple steel sliding doors, on one side, have been mounted on an easy glide track and above the sump is a push back loading system which consists of a 'sliding rail' device that allows the pallets to be pushed to the back of the unit.

The unit is shot blasted before being painted.

Note: The "floor" area above the sump is an open, box section construction designed to support pallets. Grid mesh shelving is available as a chargeable option for those who wish to have it fitted with a full "floor".

Note:

All weights, dimensions, and other figures quoted are approximate.
