

SPECIFICATION FOR CHALLENGE BIOTASK

	001/CBT
Pack Quantity	4 bottles
Bottle Volume	5 litres
Pack Weight	22.5 kg

Description: Effectively removes oil stains on concrete and other surfaces, while the beneficial microorganisms remove residual oil stains by degrading a wide variety of hydrocarbon compounds. Continued use prevents future oil buildup, maintaining surfaces that are truly deep-clean.

How to Use:

1. Dilute Challenge BioTask (depending on build up)
2. Apply Challenge BioTask to contaminated area
3. Agitate the surface as required
4. Allow to penetrate for 10-20 minutes
5. Rinse thoroughly with water
6. Further applications may be necessary on heavy build ups

Dilution: Challenge BioTask can be used full strength on heavily stained areas, but for general cleaning dilute 186–250 ml/L of water.

Shelf life: 2 years

Safety Data: Refer to our Safety Data Sheet.

Note: All weights, dimensions, and other figures quoted are approximate.
