

SPECIFICATION FOR EXPANDER TANKS

	0415/
Capacity available	1000-12000 litres
Size	Varies dependant on capacity
Colour	Yellow (PVC) or Orange (PU)

Description: The tanks are designed so that they self-erect on filling with liquid, stability being provided by a stiffened top collar with a foam insert.

Construction: PVC or PU
RF welded

Fitted with: Foam collar

Instructions for use: The following recommendations must be observed to ensure safe use of the Expander Tank and to minimise damage:
Ensure that ground surface on which the Expander Tank is to be placed is free of sharp objects.
Regularly inspect the Expander Tank for signs of damage.

Compatibility: Suitable for short term contact/storage of oil or oil-contaminated water.
For other applications please consult our technical department.

Safety Data: If contaminated wash thoroughly before returning to store or re-using the Expander Tank.
Further technical advice is available if required.

Note: All weights, dimensions, and other figures quoted are approximate.
