

SPECIFICATION FOR OIL & SEDIMENT FILTER

	0119/osfs
Size	150 x 35 cm
Colour	Orange
Sediment Retained	Up to 20kg sediment
Hydrocarbon Retained	Up to 2.5 litres hydrocarbon
Flow Rate	Up to 300 L/min

Description: Re-usable sediment filter – when used with oil the filter must be replaced.
 Easy to use and quick to attach
 Filter is capable of removing sediment particles down to 150µm.
 Hydrocarbon detection strip to identify oil pollution.
 Lightweight and highly visible colour.
 Lifting straps for safe and easy handling.
 Simple emptying and sediment washout.
 Full instructions printed on the device.

Composition: Sediment filter: multi-layered filter system of nylon monofilament
 Oil Absorbent: layers of polypropylene nonwoven material
 Outer sleeve: high visibility nylon

Pack Type: Bag

Disposal: Dispose of the filter, hydrocarbons and contaminated sediment in line with appropriate hazardous waste guidelines.

Safety Data: Further technical advice is available if required.

Note: All weights, dimensions, and other figures quoted are approximate.
