**Composition:** Low density polyethylene

**Thickness:** 500 gauge (125 microns)

**Properties:** Lightweight, good flexibility, good puncture resistance.  
Sealable by cable tie or by knotting end of boom.

**Compatibility:** Poly booms are resistant to most liquids for the duration of a spill clean-up. However it is not recommended that they be used with strong oxidizing agents as contact may lead to spontaneous combustion.  
Normally they are used once and then disposed of. If reusing they should be cleaned with soapy water before reuse.

**Shelf Life:** If stored away from direct sunlight the shelf life is unlimited.

**Disposal:** May be disposed of by landfill or incineration, in accordance with local and national regulations, taking into account the classification of the liquid which may contaminate the poly boom.

**Safety Data:** After use care should be taken when handling the boom if contaminated with hazardous liquids.  
Further technical advice is available if required.

**Note:** All weights, dimensions, and other figures quoted are approximate.
