Description: A compact and fully collapsible self-erecting tank; It has a fully sealed foam collar causes tank to “pop up”.

Construction: 900 gsm PVC-coated material, RF welded.

Fitted with: Foam collar

Instructions for use: The following recommendations must be observed to ensure safe use of the Pop Up Tank and to minimise damage:
Ensure that ground surface on which the Pop Up Tank is to be placed is free of sharp objects.
Regularly inspect the Pop Up Tank for signs of damage.

Compatibility: Suitable for short term contact/storage of oil or oil-contaminated water.
For other applications please consult our technical department.

Safety Data: If contaminated wash thoroughly before returning to store or re-using the Pop Up Tank.
Further technical advice is available if required.

Note: All weights, dimensions, and other figures quoted are approximate.
